HUBER SE honours apprentices for successful graduations

03.03.2023

HUBER SE honoured eleven graduates of industrial apprenticeships for their successfully passed final exams. At the HUBER Forum in Berching/Erasbach, the executive board and trainers congratulated and wished the newly graduated professionals much success in their takeover departments and for their further career.

In January and February of this year, six precision mechanics specialising in mechanical engineering, five metalworkers specialising in construction technology and one mechatronics engineer successfully completed their training at HUBER.

The now former apprentices, eleven of whom were taken on by the company as in permanent employment, are: the precision mechanics Simon Braun (takeover department: cutting), Milena Donhauser (final assembly), Bastian Halbig (cutting), Nico Muschaweck (final assembly), Daniel Schön (cutting) and Stefan Stampfer (machining), the metalworkers Michael Benz (shell construction), Georg Grillenbeck (shell construction), Tim Hübner (shell construction) and Tobias Rösch (shell construction), as well as the mechatronics technician Lukas Heidler (service technician for I&C technology).

Congratulations from the board and trainers

The board members Dr. Oliver Rong (Chief Engineering & Production Officer, Deputy Chairman of the Executive Board) and Rainer Köhler (Executive Board Member for Sales) as well as the trainers personally congratulated the graduates on their successful completions and wished them much joy and success in their take-over departments as well as for their further professional careers.
